Sadly the officially available version of Soundflower isn't signed because it's an open source project and - as far as we know - no one has volunteered to do the work and pay the \$99 fee to obtain a signing certificate.. That's why we have built a signed version of Soundflower which will work on OS X 10.. Anyone noticing it not working after the beta 2 build? I had a version of soundflower that worked with the first beta..
